## WELDING & PLASMA CUTTING MACHINES

**Wearresist Technologies'** Agency Products Division offers Welding and Plasma Cutting Products from Cersora S.p.A., Italy, a leading manufacturer of welding (MIG-MAG, TIG, MMA, spotters, plasma) and plasma cutting equipment. The range includes HQC (High Quality Cut)

plasma cutting power sources suitable for CNC pantographs too; MIG/MAG welding power sources with pulsed and double pulsed arc, also ready for connection to robots; TIG welding power sources ready for connection to robots, also with "cold wire" system; as well as Plasma Welding Consoles, ready for connection to robot and with "cold wire" system.

### Special Sections

- Power Generation & Transformation/  
Switchgear & Control Panels - 257 - 314
- Tamil Nadu - 315 - 350
- Batteries & UPS Systems - 351 - 364
- IPP Industry Plus - 365 - 373
- Index - Key to All Products in this Issue - 395 - 475

## MCCBs, SUSOL SERIES

**CECO Electronics** offers Susol Series MCCBs (moulded case circuit breakers) manufactured by LS [formerly LG Industrial Systems, South Korea]. They are used in cascade rated system, allowing the use of lower interrupting circuit breaker down stream, which leads to lower system cost.

These breakers provide unmatched flexibility by employing a wide variety of direct units including fixed thermal and magnetic, adjustable thermal-fixed magnetic, adjustable thermal-adjustable magnetic and electronic options. These are available for world best breaking capacity up to 150 kA, in one frame size in ratings from 16-160 A and in 3 frame sizes in ratings from 40-800 A with the much desired ambient temperature rating at 55°C. These breakers also have the facility for communication interface through RS485 (Modbus) for various needs.

## ROUNDNESS/CYLINDRICITY TESTER

**Mahr GmbH, Germany**, has launched recently a new version of its MarForm MMQ 200 Roundness/Cylindricity tester with motorised TTV probing system. The TTV probe is a patented system and has a 360° motorised bi-directional probe intended to reduce operator involvement and to improve measurement capability. The MMQ 200's EasyForm 3 software guides users through measurement set-up and operation. As many as 32 measuring routines can be saved for automatic operation. Measurement results are immediately displayed on the screen, including 3D representation with colour or grid lines providing an interactive graphic preview. Results can be printed, saved in file formats such as PDF or exported for analysis in other software packages.

For further information contact:

**Mahr Metrology India Pvt Ltd**  
R-38, 4th Main Road  
Anna Nagar, Chennai 600 040

## Material & Cable Handling Solution

### Range of Products:

- Spring Operated Cable Reeling Drum
- Motorised Cable Reeling Drum
- Cable Drag Chain
- Wireway Profiles, Scales & Tables
- Electrical Nameplate Changers
- Wireway Profiles
- AEC Cable Trays
- Thruster Brakes
- Drum Controller & Motor Controller
- Resistance Boxes
- Limit Switches
- Current Collector Carriers

**OEPL**
